## WIRELESS CAR CHARGER MOUNT

Charge your wireless charging compatible phone

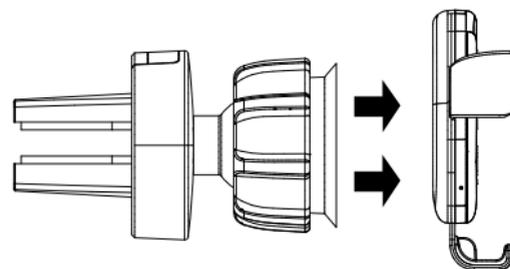

Congratulations on purchasing our wireless car charging mount. This device is compatible with mobile phones equipped with wireless charging technology. Your new phone mount can be used to enable hands-free while driving, and charge your phone, giving you more battery life when needed.

Please read this manual prior to use

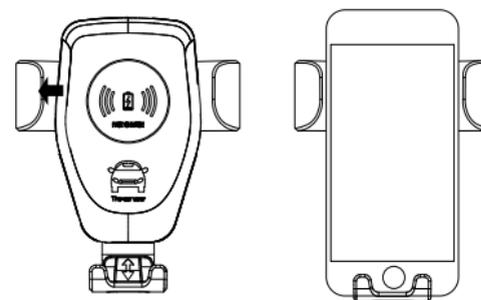

### Installation

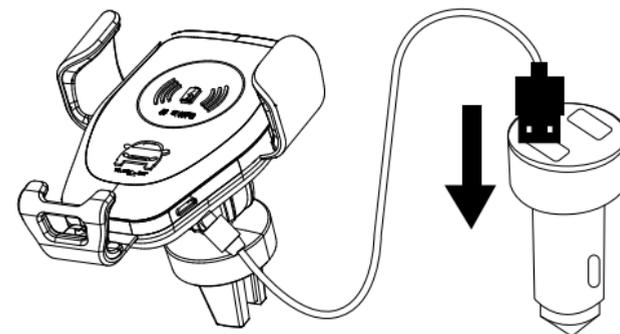

1. Connect the wireless charger to the air vent clamp.
2. Securely mount the device to a conveniently located air vent by gently securing the clamp onto one of the vents fins.

### Charging for mobile phones

### Charging setup

1. Connect Micro-USB charging cable to wireless charger.
2. Connect USB end to car charger (not supplied).
